

CLAIMS

1. Method for making, viewing and/or ordering a photographic image, comprising the following steps of:
 - making a recorded image with a digital camera;
 - wirelessly sending the image, immediately after
- 5 it has been made, to a processing unit for processing of the digital data from the digital camera; and
 - wirelessly sending a code to a printing unit during processing of the digital data, which printing unit is disposed close to or at a predetermined distance
- 10 from a digital camera, wherein the person of whom an image is made receives a receipt with a code with which he/she can view and/or order the recorded image.
2. Method as claimed in claim 1, wherein wireless transmission takes place within a WLAN (Wireless Local
- 15 Area Network) wherein the digital camera and/or the printing unit is provided with a WiFi antenna.
3. Method as claimed in claim 1 or 2, wherein the digital camera and/or the printing unit are connected to a Personal Digital Assistant (PDA) which is also
- 20 provided with means for wireless communication.
4. System for coding a recorded image, comprising:
 - a camera for making the recorded image;
 - a transmitter/receiver for sending the recorded image;
- 25
 - a central processing unit for receiving and processing the recorded image and for assigning thereto a code for identification of the image; and
 - a code printer for printing on a receipt the code generated by the processing unit.
- 30 5. System as claimed in claim 4, also comprising means for wireless communication in accordance with the WLAN or WiFi protocol between the camera, the central processing unit and/or the code printer.

6. System as claimed in claim 4 or 5, also comprising a code reader for reading the code on the receipt and displaying the associated image on a screen in response to the read code.

5 7. System as claimed in claim 6, also comprising printing means for printing the recorded image associated with the code.

10 8. System as claimed in any of the foregoing claims, wherein the camera, processing unit and code printer communicate wirelessly with each other over a relatively large distance, for instance in the order of magnitude of about 3 km.
